

Project A (Course) Landing Page

FE21 Team 3
Ariel, Ronny, Samuel, Vendula

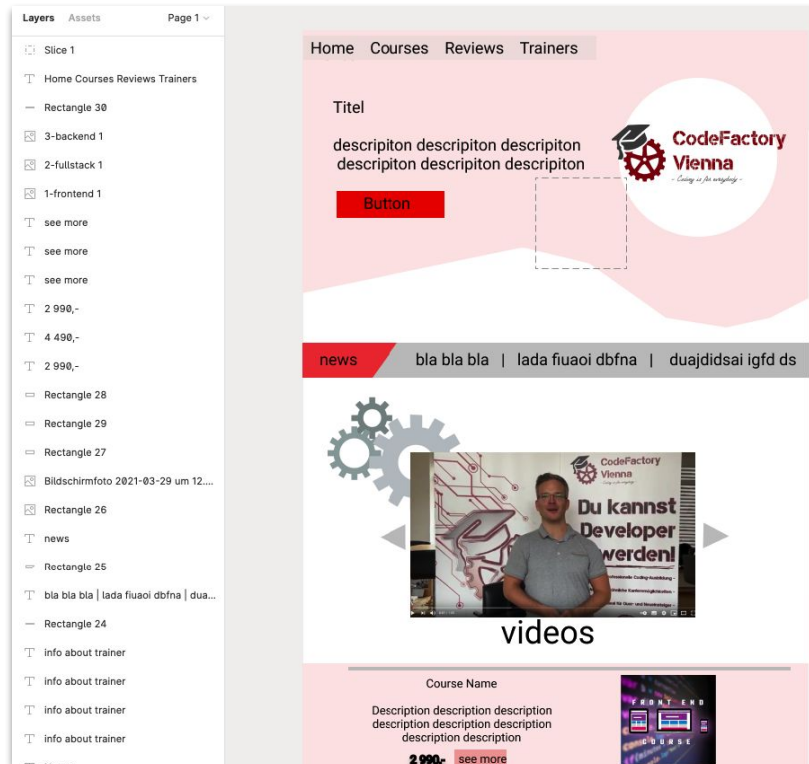

How have we organized ourselves?

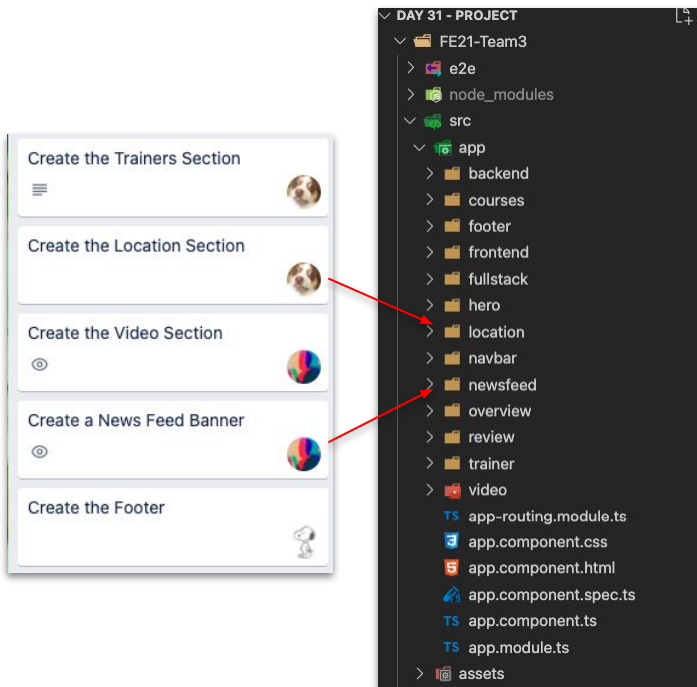

- 3+ hrs “Kick-off Meeting”
 - ◆ Set up of Trello
 - ◆ Definition of Done
 - ◆ Design creation in Figma
 - ◆ Definition of work items
- Daily 9.00 AM Meeting
 - ◆ Review of current product state
 - ◆ Definition of new work items based on that
 - ◆ Who is doing what?
- Trello!
- Slack for Q&A/ Push/ Pull Github coordination

Organization | Design & Figma

- Overall design & layout in Figma
- Some ideas were more rough, some very detailed
- Definition of color palette
- Goal: Identification of components → work items
- Goal: “Emerging design” → plan while on the way

Organization | 1st Work Items

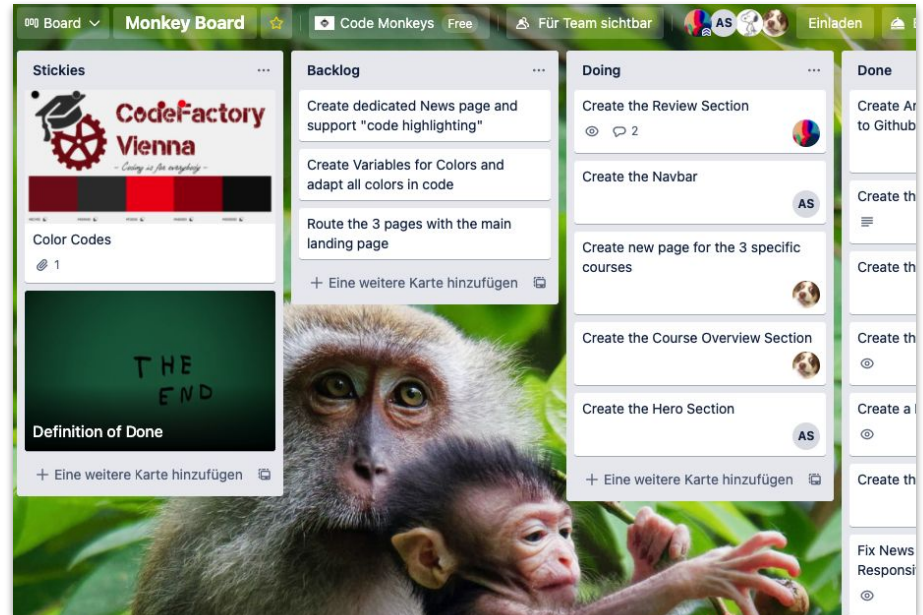

- Work items created in Trello
- Empty components created upfront in VS
- Goal: Avoid Merge conflicts
- Goal: Clear responsibilities

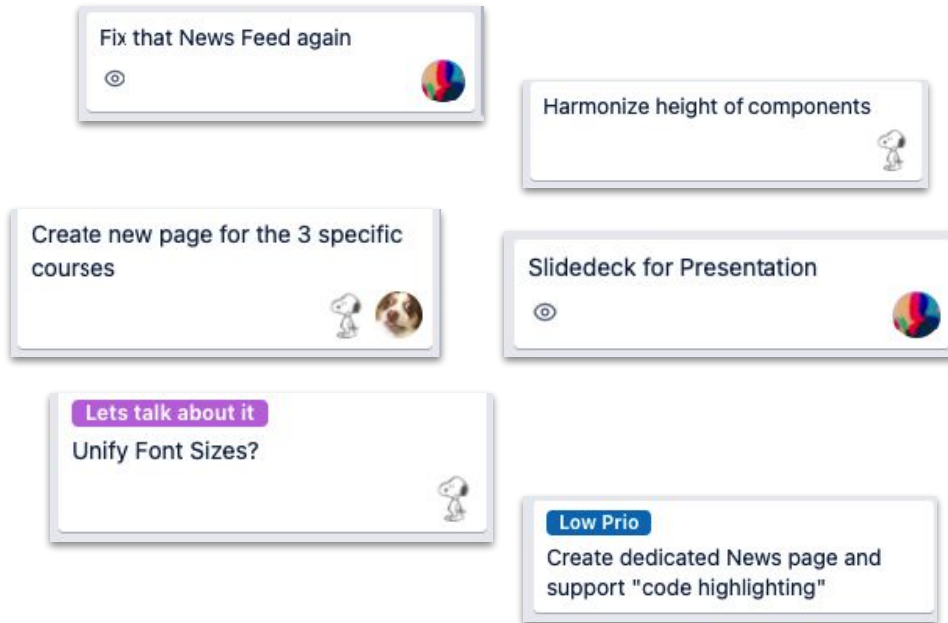

Organization | Trello

- Clear Responsibility
- Doing reflected indeed the current doing

- DoD:
 - ◆ Implemented Task
 - ◆ Checked on Mobile (Responsive Design)
 - ◆ Linked to Codefactory Main Page
 - ◆ Pushed to Github

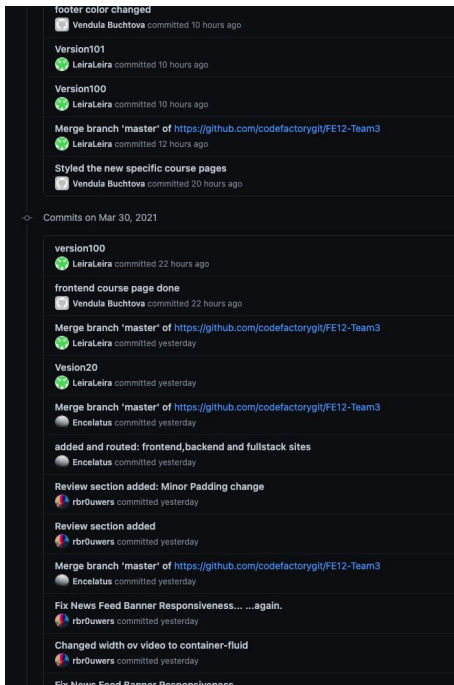

Organization | “Emerging Design” or “let’s plan while on the way”

- 9.00 AM Meeting
- ◆ Review of the current state
 - ◆ What can we improve?
 - ◆ Definition of new work items
 - ◆ Who is doing what?

Organization | Github

- Push directly into Master
- No branching (overhead for that project)
- Basically no merging necessary
- Slack Notifications when push/pull dependencies (e.g. color variables over all components)

Product | Few implementation details

- Strong use of components
- Use of CSS variables for colors
- AOS (Animate on Scroll)

- ◆ `import AOS from 'aos';`
- ◆ `ngOnInit() {AOS.init();}`
- ◆ `<div class="col col-sm-12 col-md-12 col-lg-4 d-flex align-items-stretch" data-aos="flip-left" data-aos-easing="ease-out-cubic" data-aos-duration="1000">`
